Position: Software Engineer

Job Description:

LP Technologies (LPT) is currently looking for a Software Engineer to join our team. The ideal candidate is one who is detail oriented, who can adapt to changing priorities, and work well independently or as part of a team. The Software Engineer will work on maintaining existing desktop and web applications, as well as help design and create new ones.

Responsibilities:

- Maintain current LPT software under direction of Software Lead
- Create and maintain new LPT products following code structure
- Complete coding and documentation per general and detail design specifications
- Participate in architecture and design of new and current software products
- Work with minimal supervision to meet programming deadlines
- Apply subject matter expertise to various projects/ program initiatives
- Act as technical escalation support resource for LPT Help Desk for products worked on

Requirements:

- MIS or Computer Science Degree from an ABET accredited university
- Two (2) or more years of programming experience
- Experience working with object-oriented programming languages
- Relational database knowledge in Microsoft SQL and MySQL
- Experience working with REST APIs
- Practical experience with git
- Experience in professional software engineering practices including code standards, code reviews, testing and development

Preferred

- GUI frameworks such as Qt
- Ability to write high-quality code tests
- Experience working with large distributed systems and architectures
- Aptitude to learn and research
- Independent and self-motivated
- Always looking to be learning and growing
- Strong communication skills

Benefits

- Paid vacation
- Paid holidays
- Personal and Company Performance Bonuses
